

## Updated Analysis of 2016 STV Delegate Election Data (Write-ins/"Mentions"/Excluded)

January 18, 2017

Prepared by Janet Kobren, PNB Secretary

### **UPDATES INDICATED IN ITALIC BURGUNDY**

**ONE PARTICULAR MEMBER VERIFICATION DONE BY WPFW MEMBERSHIP DEPARTMENT SUBMITTED ON JANUARY 12, 2017 APPEARS TO HAVE AFFECTED THE LISTENER ELECTEDS RESULTS AND IS HIGHLIGHTED IN CHARCOAL**

### Overview

As part of her preparation to implement the 2016 Delegate Elections recount motion approved by the PNB on 12/13/16, the iED gave the PNB Secretary authority to obtain verification information from GMs on individuals whom voters from their respective stations chose to write-in on their ballots. This included the individual's membership class (Listener-Sponsor or Staff) and membership status (valid membership within the election membership period, July 1, 2015 - June 30, 2016, the election "record date").

The PNB Secretary had been corresponding with Kenny Mostern, Vice President for Western US Operations for TrueBallot since early December to clarify the contents of the two disks TrueBallot had sent to her and learned that the individual write-ins were located in TrueBallot's write-in report files and STV input files.

All the write-ins, their rankings and the specific filenames where they are located can be found below under the Data section below. The notations in blue were added by PNB Secretary Janet Kobren to the best of her knowledge.

Note that for the individual names sent to the GMs by the PNB Secretary and **all** five GMs (WBAI, KPFK, **KPFT, WPFW**, and KPFA) responded and provided some of the membership information. Also note that the data provided below only addresses Write-ins and Excludeds and does not address other election irregularities like discrepancies on the election website or whether members were sent proper or multiple ballots, or other election issues.

### Terminology

**Write-in** = an individual the voter wrote in on the write-in line of their ballot and gave a ranking to.

**"Mention"** = (a TrueBallot classification, not a Pacifica election term) defined by TrueBallot as individuals for whom voters did not give a "top" ranking to and who had only been ranked two or fewer times.

**Excluded** = An individual whose name was written in on a ballot who either did not have a verified membership status or whose name was written whose membership

class did not match the membership class of the election or who was already seated on their respective LSB was EXCLUDED from being run through the STV tally.

**Aggregated** = multiple names (write-ins) lumped together as a single candidate and run through the STV tally as the "Write-in (aggregate)" CANDIDATE; TrueBallot created write-in report files containing the aggregated list of names, including how many times each individual was ranked and how many rankings the individual got.

**Disaggregated** = one or more individual names separated out from the aggregated list of candidates and included in the STV input file as either as an individual CANDIDATE or EXCLUDED.

### **Vetting write-ins**

When it came to write-ins it was the NES' responsibility to instruct TrueBallot before the STV tally was run to provide the NES or LES with all the names of the write-ins for verification. The NES or LES should have verified from the membership data that had been provided by management for sending out ballots that each write-in was a member of the correct membership class for the election and that the write-in's membership status was within the year preceding the record date. Once this was done, TrueBallot should have been instructed to EXCLUDE any write-in who was not verified. TrueBallot with the help of the NES/LES should have also checked that a write-in was not a misspelling of or alternate name for a candidate on the same ballot, and if so, if the voter did not rank the candidate listed on the ballot the write-in vote should be combined with the candidate's and tracked as belonging to the candidate. If not, the write-in should be considered a separate individual.

### **Disaggregating and Mentions vs. Write-ins**

Per Article 15, Section 1.A.2. which says, "Vote counting shall start with a tabulation of each voter's first, or only, choice vote" means that if someone, a candidate or someone a voter wrote in on their ballot, is given any ranking by voter, the individual who was written in must be counted in the tally.

Apparently the NES did not notify TrueBallot of the Voting Methods in the bylaws and thus they were not followed by TrueBallot for either the original or re-run tally.

Of the 163 unique write-in names listed in the write-in report files, only three were disaggregated as reported in TrueBallot's 10/28/16 Certification Addendum. The rankings for the remaining 160 individuals were basically excluded because they were considered by TrueBallot as "mentions", not bonafide write-ins, and were counted as part of the "Write-in (aggregate)" CANDIDATE and did not appear in any of the round-by-round results. And although only 56 of these 160 names have since been vetted it is

likely that many of the remaining 104 individuals were also valid and verifiable members of the appropriate membership class.

All should have been disaggregated and counted separately and included in the runners-up lists that have to last for two years in their respective election.

Furthermore, the voter(s) who wrote them in and ranked them were disenfranchised, the runners up lists for each station that need to last until the 2018 Delegates election are incomplete and even incorrect in some cases, and also there is a possibility in a few cases, especially at WPFW, some of the ELECTEDs might be incorrect.

### **WPFW Listener election**

It is clear from the TreBallot files that WPFW was handled differently from the other stations, particularly when it came to the Listener election. There were 51 unique “mentions” in the write-in report for the Listener election of which 40 were not vetted ***prior to either STV runs*** and all ***apparently*** were ***aggregated***. ***Subsequently, in mid-January the WPFW Membership Department checked on their membership class and membership status, reported back on 47 of the 51 and the membership class/status of only 27 of the 47 was verified, including one whose membership class was ambiguous. The 51 write-in/“mentions” were likely lumped together in the “Write-in (aggregate)” CANDIDATE.***

In addition, the STV input file contained 7 named ***(disaggregated)*** write-ins who were not among the 51, ***except for one individual who goes by multiple names: Murray Cliff, Murray (Cliff) Smith, and Murray Smith. There was no valid membership status for any of these names for the election membership period, yet write-in Murray Smith had been disaggregated in the STV run and was among the 9 Listener ELECTEDs listed on the election website. None of the remaining 6 disaggregated Listener write-ins had been vetted prior to the STV run (or by the WPFW Membership Dept in January 2017, including Christine Cutter and Julie Hewitt, both of whom also became ELECTEDs, and three of the remaining four disaggregated write-ins became Listener runners up even though they were Staff members. The 7th did not even appear as a runner up.***

### **Summary of listings below**

For the 10 elections, below is a listing of 176 write-ins/“mentions”/other documented on the TrueBallot disks including:

- 160 unique individual names which were written in on ballots, designated by TrueBallot as “mentions” (not write-ins) and not disaggregated,
- 3 non-names written in all of which should have been excluded,

- 3 unique individuals whose names were written in on ballots and disaggregated (Ahmad Anderson, KPFA Listener; Jaime Rodriguez, KPFT Listener; and Ebon Charles, WBAI Listener), and
- 10 undocumented write-ins who were included in one of the tallies.

## Data

### Legend for color-coding

**Charcoal** = WPFW write-ins who were listed as Electeds on the Election website that were not valid members during the election membership period (July 1, 2015 - June 30, 2016) per WPFW Membership Dept email forwarded by WPFW GM (1/12/17)

**Green** = “Mentions” who were candidates in the same membership class election or were verified members of the membership class of same membership class election (exs. Listener candidate for Listener election or Staff member for Staff election), whose membership status was valid within the membership period for the election, and should have been disaggregated

**Gold** = “Mentions” whose membership class and/or membership status was not verified. All of these write-in (“mentions”) were aggregated, i.e., lumped together in the STV input files as a single CANDIDATE named “Write-in (aggregate)” and thus did not appear in any of the round-by-round results and not ending up as runners up.

**Orange** = “Mentions” whom the NES should instructed TrueBallot to excluded from the STV tally by for one reason or another but apparently were not excluded.

### Legend for other matters

Numbers in (parentheses) are based on the TrueBallot write-in reports the filenames and contents of which were confirmed by TrueBallot. These files include the ranking(s) that one or more voter entered for the individual they wrote in (or in TrueBallot’s terminology, “mentioned”) on their ballot, so for example, (5,2 2) means that three voters wrote-in (“mentioned”) the individual, one voter ranking the individual #5 and two voters ranking the individual #2;

## WPFW

### WPFW Listener election

**Note:** Based on the two TrueBallot disks, there were two different and inconsistent write-in listings: 51 unique write-ins listed in the write-in report which I will refer to as SET 1 and the WPFW Listener STV input file which I will refer to as SET 2. When I inquired of TrueBallot whether there is another WPFW Listener write-in report somewhere on the two disks I was told no.

#### SET 1:

\* 51 unique “mentions”, compiled from the WPFW Non-Aggregated Write-in report.docx (file) on the 10/21/16 TrueBallot disk, with path 0731601 Pacifica/3671601 WPFW/WPFW STV Count/ \*
